

Who Are We?

Baker Wilkins & Smith is an international firm of construction consultants, our main core services being quantity surveying and project management.

We were established in London in 1955 based on the original founders' combined interest in international projects, mainly in Saudi Arabia. This soon spread to the whole Gulf region, Africa and the Far East. Whilst maintaining a strong presence in the UK with two other offices soon established, there was always a great emphasis on international markets. We opened our first Middle East office in Bahrain in 1972 and since then have expanded into Qatar, the United Arab Emirates and Oman with a strong association in the Lebanon. We have also worked throughout mainland Europe and have registered offices in Portugal and Switzerland.

The UK and international offices have always worked extremely closely on a day to day basis and this has been the foundation of our success particularly in the Middle East where we have now been involved in over 1 300 construction projects. A large proportion of our most recent projects have been in the hospitality, residential, retail, landscaping and public realm and major mixed-use commercial sectors. We have also built up an expertise in specialist areas such as dispute resolution, heavy engineering and historic building restoration.

Within the confines of this website, it is not possible to fully embrace all aspects of our business and the market sectors and regions in which we operate and we would welcome the opportunity to discuss specific matters and your particular needs in more detail.

Job Opportunities

We are continually expanding our business and currently require technical quantity surveyors throughout the Middle East region.

Specific and urgent requirements will be listed here from time to time but please do not hesitate to make contact if you would be interested in joining us.

Please provide your CV to Mrs Deborah Edwards via e-mail at dedwards@bakerwilkins.com.
